

Gearbox solution in difficult times

In times of crisis, choose our most economical gearboxes at an unbeatable price.

The PRE/PRF series is the all-rounder on the planetary gearbox market. With helical gearing, robust internal construction, smooth operation and high torque density, this product is truly best-in-class. 10 arc-min backlash allows the PRE/PRF to be applied to a wide range of applications.

PRE

PRF

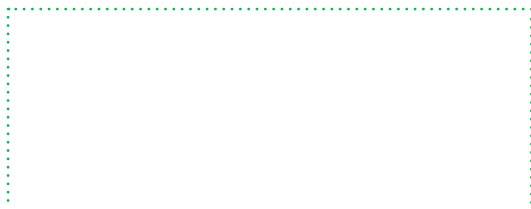

- Carburized helical gears contribute to reduce vibration and noise.
- Because of the adapter-bushing connection, the gearbox can be attached to any motor all over the world.
- High efficiency (Efficiency rate $\geq 95\%$)
- Can be mounted in any installation position and operated maintenance-free.
- Reliable delivery times in challenging times
