

**FlexxPump1 ND and 4 D**

**Applicators and  
lubricant distributors**

## Modern lubrication systems for challenging applications

### In the right place at the right time with the right dosage

More than two-thirds of unpredictable rolling bearing failures are lubricant-related. The failures are mainly caused by the wrong choice of lubricant or incorrect dosing of grease and oil.

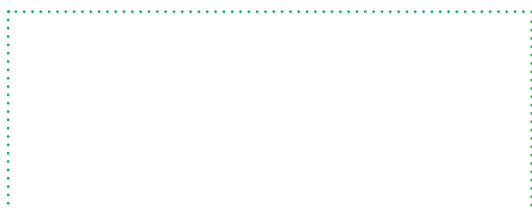

Together with our competent partner TriboServ, we offer automatic lubrication systems that prevent production stops. Get in touch with our experts and let them advise you!

Our recommendation for the maintenance of your machines:

- FlexxPump lubricators
- Lubricant distributors: Progressive distributors, electromechanical distributors, splitters
- Applicators for the lubrication of gears and chains: PU lubrication gears, chain lubrication pinions
- Suitable accessories such as lubricants and cartridges
